At real-world scale · rolling 12 months

- 2,353,389 kg of waste diverted from landfill for every site
- 25 Olympic swimming pools of drinking water (2,500 kL each)
- 91 t CO₂-e less than the same months of the baseline year (2025–26)
- 364 trees planted, and 3.1 ha of native vegetation, habitat or wetland restored
- 2,926,597 kg CO₂-e of operational emissions for every site
- 183 people took part in environment programs

Progress towards the eco standards · rolling 12 months

Emissions reduction vs baseline	0% of 30%
Renewable electricity · industry 43%	291% of 82%
Landfill diversion · industry 81%	54% of 90%
Fleet electrification · industry 13%	5% of 20%

The mark on each bar is the published industry benchmark; figures and sources are on page 2. No other organisation's data is used.

Headline figures are rolling 12 months totals; the change is against the same calendar months of the baseline year. (P) provisional: a target-based category with less than 12 months of data. Your Yarta data operator: Chris Walker. The score is self-declared under the published Yarta method v0.1 (draft); it is not an accredited rating, certification or offset. Page 1 of 3.

Method: emissions use the National Greenhouse Accounts Factors 2024 (DCCEEW), location-based electricity for WA. Scope 3 covers waste to landfill and upstream fuel and electricity only. Flights are recorded but not yet converted. Avoided emissions use NSW DECCW (2010) factors, flagged as dated, and are never netted against emissions. Comparisons with the baseline use the same calendar months of 2025–26. Figures are entered by Yarta from the organisation's source documents and verified by a second Yarta analyst. Disclosures and assumptions

Items marked ● are delivered by a Recycle Group business (The Mattress Recycling Company, Recycle Warehouse and the group's collection business). Yarta is part of Recycle Group. You can use any provider; your score and its verification do not depend on who does the work. The projection and the score with Yarta help are estimates from the published assumptions; they are not a promise or a guarantee. A change since completed work is a change in the figures, not proof that the work caused it.

Booked items start in the month booked. The others start from next month, two a quarter, weakest category first. Each change builds up evenly over 6 months, and everything else is held at the latest 12 months. Work completed in the last 6 months is not recommended again; its effect shows in your verified figures. Rules and assumptions: [yes.com.au/method](#). Page 3 of 3.
