WITH YARTA HELP
56
estimate · plan on page 3

WASTE & RESOURCE RECOVERY
653
tonnes diverted from landfill
baseline year
Diversion 43% · target 75%

CARBON & EMISSIONS
2,162
t CO₂-e operational emissions
baseline year
Scope 1, 2 and 3 · 382 t avoided, reported separately

ENERGY & RENEWABLES
306
MWh of grid electricity
baseline year
Renewable 207% of use · target 50%

WATER
3,359
kL of drinking water used
baseline year
Alternative water 75% of all water

Category scores · change on last year

Energy & Renewables	80	—
Fleet & Transport	26	—
Carbon & Emissions	50	—
Water	75	—

Community & Participation (P)	12	—
Governance & Improvement	97	—

At real-world scale · rolling 6 months

- 10,892 kg** of waste diverted from landfill for every vehicle
- 1.3** Olympic swimming pools of drinking water (2,500 kL each)
- 36,039 kg CO₂-e** of operational emissions for every vehicle
- 52 people** took part in environment programs

Progress towards the eco standards · rolling 6 months

Emissions reduction vs baseline	0% of 25%
Renewable electricity · industry 43%	207% of 82%
Landfill diversion · industry 51%	43% of 80%
Fleet electrification · industry 13%	5% of 15%

The mark on each bar is the published industry benchmark; figures and sources are on page 2. No other organisation's data is used.

Headline figures are rolling 6 months totals; the change is against the same calendar months of the baseline year (2025–26 is the baseline year, so there is no earlier year to compare with yet). (P) provisional: a target-based category with less than 12 months of data. Your Yarta data operator: Morgan Lee. The score is self-declared under the published Yarta method v0.1 (draft); it is not an accredited rating, certification or offset. Page 1 of 3.

Emissions · t CO₂-e

	JUN 26	ROLLING 12 MONTHS	BASELINE MONTHS
Scope 1 · fuel and gas	94.0	610	610
Scope 2 · grid electricity	46.4	226	226
Scope 3 · landfill and upstream	215.2	1,326	1,326
Total operational emissions	355.6	2,162	2,162
Avoided emissions · reported separately, never deducted	64.7	382	

Key figures

FIGURE	JUN 26	UNIT	NOTE
Diesel purchased	31,187	L	
Petrol purchased	3,396	L	
Fleet kilometres	191,869	km	18.4 L/100 km
Fleet electrification	4.9%		61 vehicles; plug-in hybrids count as half
Flights	4	trips	Recorded; emissions factor pending
Grid electricity	62,639	kWh	
Renewable electricity	100.0%		207.3% over 12 months
Natural gas	19.6	GJ	
Potable water	366	kL	Alternative water 81.4%
Total waste	256.2	t	Landfill 143.0 t
Landfill diversion	44.2%		Recovery 43.2%
Trees planted	—	trees

Industry benchmarks · published figures for your sector

FIGURE	YOU	BENCHMARK	WHAT THE BENCHMARK IS
Renewable electricity	207%	43%	Renewable share of Australia's electricity, 2025 [1]
Landfill diversion	43%	51%	Commercial and industrial waste recovered, NSW, 2022–23 [2]
Fleet electrification	5%	13%	Battery-electric share of new light vehicles registered in Australia, 2024 [3]
End-of-life tyre recovery rate	—	56%	Australia, 2022–23, mostly energy recovery [4]
National resource recovery rate	—	66%	All streams, Australia, 2022–23 [4]

Benchmarks v0.1 · sources checked 29 September 2026. Benchmarks come from public sources only; Yarta never pools customer data. Sources: [1] Clean Energy Council, Clean Energy Australia 2026 (2025 data) · [2] NSW State of the Environment 2024, waste and recycling (2022–23 data) · [3] National Transport Commission, light vehicle emissions intensity in Australia (2024 data) · [4] National Waste and Resource Recovery Report 2024, DCCEEW (2022–23 data).

Data quality and evidence

Required figures supplied	100%
Figures backed by evidence	100%
Evidence grades	Energy A · Fleet A · Water A · Waste B · Circularity A · Land B · Nature B · Community B · Governance A

Method: emissions use the National Greenhouse Accounts Factors 2024 (DCCEEW), location-based electricity for QLD. Scope 3 covers waste to landfill and upstream fuel and electricity only. Flights are recorded but not yet converted. Avoided emissions use NSW DECCW (2010) factors, flagged as dated, and are never netted against emissions. Comparisons with the baseline use the same calendar months of 2025–26. Figures are entered by Yarta from the organisation's source documents and verified by a second Yarta analyst. Full method: yes.com.au/method. Page 2 of 3.

Disclosures and assumptions

Items marked • are delivered by a Recycle Group business (The Mattress Recycling Company, Recycle Warehouse and the group's collection business). Yarta is part of Recycle Group. You can use any provider; your score and its verification do not depend on who does the work. The projection and the score with Yarta help are estimates from the published assumptions; they are not a promise or a guarantee. A change since completed work is a change in the figures, not proof that the work caused it.

Booked items start in the month booked. The others start from next month, two a quarter, weakest category first. Each change builds up evenly over 6 months, and everything else is held at the latest 12 months. Work completed in the last 6 months is not recommended again; its effect shows in your verified figures. Rules and assumptions: yes.com.au/method. Page 3 of 3.
