WITH YARTA HELP
68
estimate · plan on page 3

Category scores · change on last year

At real-world scale · rolling 12 months

Progress towards the eco standards · rolling 12 months

The mark on each bar is the published industry benchmark; figures and sources are on page 2. No other organisation's data is used.

Headline figures are rolling 12 months totals; the change is against the same calendar months of the baseline year. (P) provisional: a target-based category with less than 12 months of data. Your Yarta data operator: Morgan Lee. The score is self-declared under the published Yarta method v0.1 (draft); it is not an accredited rating, certification or offset. Page 1 of 3.

Emissions · t CO₂-e

	JUL 26	ROLLING 12 MONTHS	BASELINE MONTHS
Scope 1 · fuel and gas	88.8	788	855
Scope 2 · grid electricity	144.6	1,359	1,446
Scope 3 · landfill and upstream	509.9	6,210	7,482
Total operational emissions	743.3	8,357	9,782
Avoided emissions · reported separately, never deducted	245.7	2,970	

Key figures

FIGURE	JUL 26	UNIT	NOTE
Diesel purchased	4,921	L	
Petrol purchased	610	L	
Fleet kilometres	22,667	km	31.4 L/100 km
Fleet electrification	8.7%		23 vehicles; plug-in hybrids count as half
Flights	11	trips	Recorded; emissions factor pending
Grid electricity	628,514	kWh	
Renewable electricity	45.6%		43.8% over 12 months
Natural gas	1,386.8	GJ	
Potable water	3,715	kL	Alternative water 8.7%
Total waste	680.5	t	Landfill 353.2 t
Landfill diversion	48.1%		Recovery 47.1%
Trees planted	0	trees	
Program participants	32	people	

Industry benchmarks · published figures for your sector

FIGURE	YOU	BENCHMARK	WHAT THE BENCHMARK IS
Renewable electricity	44%	43%	Renewable share of Australia's electricity, 2025 [1]
Landfill diversion	47%	51%	Commercial and industrial waste recovered, NSW, 2022–23 [2]
Fleet electrification	9%	13%	Battery-electric share of new light vehicles registered in Australia, 2024 [3]
Metals recovery rate	—	90%	Australia, 2022–23 [4]
Plastics recovery rate	—	12.5%	Australia, 2022–23 [4]
Average recycled content in packaging	—	44%	Australia, 2023–24 [5]
National resource recovery rate	—	66%	All streams, Australia, 2022–23 [4]

Benchmarks v0.1 · sources checked 29 September 2026. Benchmarks come from public sources only; Yarta never pools customer data. Sources: [1] Clean Energy Council, Clean Energy Australia 2026 (2025 data) · [2] NSW State of the Environment 2024, waste and recycling (2022–23 data) · [3] National Transport Commission, light vehicle emissions intensity in Australia (2024 data) · [4] National Waste and Resource Recovery Report 2024, DCCEEW (2022–23 data) · [5] APCO, Australian Packaging Consumption and Recovery Data 2023–24.

Data quality and evidence

Required figures supplied	100%
Figures backed by evidence	100%
Evidence grades	Energy A · Fleet B · Water A · Waste A · Circularity A · Land A · Nature C · Community B · Governance A

Method: emissions use the National Greenhouse Accounts Factors 2024 (DCCEEW), location-based electricity for SA. Scope 3 covers waste to landfill and upstream fuel and electricity only. Flights are recorded but not yet converted. Avoided emissions use NSW DECCW (2010) factors, flagged as dated, and are never netted against emissions. Comparisons with the baseline use the same calendar months of 2024–25. Figures are entered by Yarta from the organisation's source documents and verified by a second Yarta analyst. Full method: yes.com.au/method. Page 2 of 3.

Disclosures and assumptions

Items marked ● are delivered by a Recycle Group business (The Mattress Recycling Company, Recycle Warehouse and the group's collection business). Yarta is part of Recycle Group. You can use any provider; your score and its verification do not depend on who does the work. The projection and the score with Yarta help are estimates from the published assumptions; they are not a promise or a guarantee. A change since completed work is a change in the figures, not proof that the work caused it.

Booked items start in the month booked. The others start from next month, two a quarter, weakest category first. Each change builds up evenly over 6 months, and everything else is held at the latest 12 months. Work completed in the last 6 months is not recommended again; its effect shows in your verified figures. Rules and assumptions: [yes.com.au/method](#). Page 3 of 3.
